GROWING CHANGE  
SINCE 2001

We're a pioneering social enterprise empowering people on probation to become essential workers in our local food economy.

Through community growing spaces and partnerships with affordable food retailers, we create sustainable solutions to food poverty whilst offering meaningful rehabilitation pathways.

Supported by Foundational Economy Innovation Fund and Awards for All.

## Good Food, Good Lives

Nornir Projects in  
Greater Manchester

We partner with Greater Manchester Probation to help people on probation grow nutritious food for local food banks and community pantries. Our work reduces reliance on ultra-processed foods whilst supporting rehabilitation.

## FungAll

Partnering with Manchester Alternative Meats, we turn waste into opportunity—growing nutritious oyster mushrooms on recycled coffee and brewers’ waste. By engaging people on probation in sustainable food production, we build a circular economy that nourishes both people and the planet.

## Manchester Urban Diggers (MUD)

We use sustainable practices to improve local food systems, bringing people together to grow, cook and share healthy food.

## Eat Well Manchester

We contribute meals as part of the Eat Well scheme, which provides around 2,500 chef-prepared meals per month to families in temporary accommodation, women in refuge housing, and households experiencing food poverty.

## Growing Skills, Growing Security

GMCA-funded project creating urban farming sites and community kitchens staffed by probation teams. We produce nutritious frozen meals for affordable food outlets and families in need, while offering paths to hospitality careers.
